

## Table of Contents

<b>Networking .....</b>	<b>4</b>
IP Address .....	4
IP Components.....	5
<b>Default Gateway .....</b>	<b>5</b>
<b>Data Communications .....</b>	<b>7</b>
LAN – Local Area Network .....	8
WAN – Wide area Network.....	8
Protocol.....	8
<b>The OSI Model .....</b>	<b>9</b>
<b>Analyzing Packets Using Wireshark and Tshark .....</b>	<b>11</b>
Wireshark.....	11
Tcpdump .....	14
Types of communications .....	16
TShark .....	18
Packet Data (-x and -V and -P) .....	21
Capturing Packets .....	21
Capture filters .....	22
<b>Display Filters.....</b>	<b>22</b>
<b>Exporting Data .....</b>	<b>22</b>
<b>Filtering Live Capture.....</b>	<b>23</b>
Fetch Filters (-f).....	23
File Extraction .....	23
Automation.....	23
<b>Windows Firewall.....</b>	<b>24</b>
<b>Rules Based.....</b>	<b>24</b>
<b>Policy Based Firewalls.....</b>	<b>25</b>
<b>Next Generation Firewall (NGFW).....</b>	<b>26</b>
Benefits of Next-Generation Firewalls .....	27
<b>Linux Firewall .....</b>	<b>27</b>
<b>IP Tables .....</b>	<b>27</b>
Checking Current IP Tables Status .....	28
Defining Chain Rules .....	28
Dropping All Other Traffic.....	29
Deleting Rules.....	29
Persisting Changes .....	29
<b>IDS &amp; IPS .....</b>	<b>29</b>
Differences Between IDS & IPS .....	29
<b>Network-Based IDS (NIDS) .....</b>	<b>31</b>
<b>Host-Based IDS (HIDS) .....</b>	<b>33</b>

<b><i>Introduction to pfSense .....</i></b>	<b>35</b>
What is pfSense?.....	35
<b>Interface Naming Terminology.....</b>	<b>35</b>
<b>Installation and Configuration .....</b>	<b>36</b>
Configuring the Machine .....	37
<b><i>Introduction to Snort IDS .....</i></b>	<b>51</b>
Uses of Snort Rules .....	51
<b>Configuring Snort and Detecting Attacks .....</b>	<b>52</b>
<b><i>Introduction to Scapy .....</i></b>	<b>57</b>
Using Scapy Modules.....	58
Packet Analysis & Traffic Malware Analysis.....	61
<b><i>The Digital Investigation Process .....</i></b>	<b>64</b>
Forensics - Basic Principles.....	64
The Investigation Process .....	64
<b><i>Windows OS.....</i></b>	<b>64</b>
FTK Imager.....	64
AppData .....	65
EFS Encryption .....	65
NTFS File System .....	66
<b><i>Volatility Framework.....</i></b>	<b>70</b>
Requirements.....	70
Command Syntax .....	70
Investigation Process.....	70
Image Identification .....	71
Process and DLLs .....	71
Networking Modules.....	73
Working with Registry .....	75
Additional Information Gathering.....	77
<b><i>Monitoring the Systems.....</i></b>	<b>79</b>
Attacks from Inside the Network .....	79
Types of Attacks:.....	79
Intercept Packets from Router with Arpspoof .....	81
Performing the Password Attack: .....	86
Attacks from Outside the Network.....	87
Denial of Service .....	88
Phishing Attack .....	90

Types of Phishing Attacks .....	90
